

Miguel Angel Nava Zavala

Tlaxcala, Mexico - 5518248779 - guiguelangel@gmail.com

Summary

Entry level Software developer with 6+ months of experience. Interested in Software development, adapted to different technologies, offering scalable technological solutions with experience in development of web projects with multidisciplinary teams. I'm an almost self-taught person and I'm looking for opportunities for professional growth. Committed to learning something new and desire to surpass myself every day.

Education

Instituto Tecnológico Superior del Oriente del Estado de Hidalgo. Apan, Hidalgo, MX.

B.S. in Computer Systems Engineering | October 2021

Experience

Backend developer working by project in Virdebo, Tlaxcala, MX, 06/2021, 08/2021

- Built all the backend of Virdebo from zero, It was structured using MVC pattern.
- Developed an API of REST architecture.
- Deployed backend into Linux server and used PM2 to keep the API online.
- Helped to design the MySQL database.
- Helped to consume web services from Frontend with Angular using Observables.
- Configure the database and backend on the server to keep communication between them.

Technologies involved: NodeJS, ExpressJS, Sequelize, JWT, MySQL, Angular, TypeScript, JSON, Git, PM2, Postman.

Trainee student in Devhive as a Backend developer, Mexico city, MX, 02/2021 to 06/2021

- Developed, implemented new changes, maintained and operated the REST API.
- Created REST web services, designed JSON request/response.
- Even though the team was working remotely, we managed to coordinate efficiently, we were working under an agile approach using SCRUM.
- Designed middleware for code optimization.
- Helped to design new entities for MySQL Database.
- Collaborated on identification of REST services and user interfaces (UI) doing business process modeling.

Technologies involved: MEAN Stack, MySQL, MongoDB, Sequelize, Mongoose, JWT, Git, Bitbucket, JSON, MVC. Postman.

Certificates

Azure Fundamentals - Microsoft certified: [see here](#)

Object Oriented Programming in Java - Coursera: [see here](#)
